

Paul Steimle

Curriculum Vitae

paul.steimle@uni-goettingen.de
paulsteimle.github.io

Education

Ph.D. Physics – University of Göttingen, Germany	since 2026
M.Sc. Physics – Heidelberg University, Germany Specification in Astronomy and Astrophysics Final Grade: 1.1	2025
Year Abroad – University of New Mexico, Albuquerque, USA	2023 – 2024
B.Sc. Physics – Heidelberg University, Germany Specification in Astronomy and Astrophysics Final Grade: 1.7	2023
Abitur – Heimschule Lender, Sasbach, Germany Final Grade: 1.8	2018

Employment

Research Assistant – MPA, Heidelberg, Germany Publishing research from Master's Thesis in refereed journals	Dec. 2025 – May 2026
--	----------------------

Teaching

Tutor for key competencies during studies	2021 – 2025
Tutor for the beginners' physics lab	2021 – 2022

Conferences and Workshops

Summer School on Planetary Atmospheres – Bad Honnef (DPG)	2025
ESO La Silla Observing School	2026

Talks

MPIA PFE Coffee ISPY - SPHERE follow-up reveals scattered light disks, stellar companions and candidte exoplanets.	2026
---	------

Research

Master Thesis – Dr. Elisabeth Matthews & Prof. Dr. Laura Kreidberg The Hunt for Giant Exoplanets with Ground- and Space-Based Telescopes.	2024 – 2025
Project Practical – Assist. Prof. Diana Dragomir Adaptions and Development on a Single Transit Event search pipeline for TESS	2023 – 2024
Project Practical – Priv. Doz. Dr. Sabine Reffert Modifications and User Manual for the Radial Velocity Data Reduction Pipeline of the Waltz Spectrograph	2023

Bachelor Thesis – Priv. Doz. Dr. Sabine Reffert	2022 – 2023
Re-computation of Precise Radial Velocities of G and K Giant Stars from the Lick Survey with <code>pyodine</code>	
Project Practical – Priv. Doz. Dr. Sabine Reffert	2022
Adaptation of a data reduction pipeline for precise radial velocities on the Waltz spectrograph	

Engagement

Buddy program for first-semester students	2022 – 2023
---	-------------

Publications

Paul V. Steimle , Henri M. J. Boffin, et al.	2026
Constraining the nature of the in the planetary nebula MPA J0705-1224	
Paul V. Steimle , Elisabeth C. Matthews, et al.	2026 (in prep.)
ISPY - NaCo Imaging Survey for Planets around Young stars. SPHERE follow-up observations reveal scattered-light disks, stellar binaries, and candidate exoplanets.	
Elisabeth C. Matthews, Paul V. Steimle , et al.	2026 (in prep.)
JWST/NIRCam observations and archival data rule out planets to sub-Jupiter masses in the eccentric HD 53143 debris disk.	

Relevant Expertise

Languages

German: native speaker
English: C1 (TOEFL iBT 108)
Spanish: A2 (ZSL Heidelberg)

Tools and Programming

Python – advanced (numpy, scipy, astropy, emcee, matplotlib etc.)
Git – advanced
 $\text{\LaTeX}$ – advanced
Java – basic
Proficient in Linux, macOS, Windows
