Paul Steimle

Curriculum Vitae

Institut für Astrophysik und Geophysik
Friedrich-Hund-Platz 1
37077 Göttingen, Germany
paul.steimle@uni-goettingen.de
paulsteimle.github.io

Education

since 2026	Ph.D. Physics – University of Göttingen, Germany
2025	M.Sc. Physics – Heidelberg University, Germany Specialization in Astronomy and Astrophysics Final Grade: 1.1
2023 – 2024	Year Abroad – University of New Mexico, Albuquerque, USA
2023	B.Sc. Physics – Heidelberg University, Germany Specialization in Astronomy and Astrophysics Final Grade: 1.7
2018	Abitur – Heimschule Lender, Sasbach, Germany Final Grade: 1.8

Employment

Dec. 2025 – May 2026	Research Assistant – MPIA, Heidelberg, Germany Publishing research from Master's thesis in refereed journals.

Teaching

2026 – 2027	Theoretical Physics I – Classical and Quantum Mechanics
2021 – 2025	Tutor for key competencies during studies
2021 – 2022	Tutor for the beginners' physics lab

Conferences and Workshops

2025	Summer School on Planetary Atmospheres – Bad Honnef (DPG)
2026	ESO La Silla Observing School

Talks

2026	MPIA PFE Coffee ISPY – SPHERE follow-up reveals scattered-light disks, stellar companions, and candidate exoplanets.

Research Projects

2024 – 2025	Master's Thesis – Dr. Elisabeth Matthews & Prof. Dr. Laura Kreidberg The hunt for giant exoplanets with ground- and space-based telescopes.

2023 – 2024	Project Practical – Assist. Prof. Diana Dragomir Adaptation and development of a single-transit-event search pipeline for TESS.
2023	Project Practical – Priv. Doz. Dr. Sabine Reffert Modifications and user manual for the radial velocity data reduction pipeline of the Waltz spectrograph.
2022 – 2023	Bachelor's Thesis – Priv. Doz. Dr. Sabine Reffert Re-computation of precise radial velocities of G and K giant stars from the Lick survey with `pyodine`.
2022	Project Practical – Priv. Doz. Dr. Sabine Reffert Adaptation of a data reduction pipeline for precise radial velocities on the Waltz spectrograph.

Engagement

2022 – 2023	Buddy program for first-semester students

Publications

2026	**Paul V. Steimle**, Henri M. J. Boffin, et al. Constraining the nature of the binary in the planetary nebula MPA J0705-1224; RNAAS, 10, 71, **doi.org/10.3847/2515-5172/ae5894**
2026 submitted	**Paul V. Steimle**, Elisabeth C. Matthews, et al. ISPY – NaCo Imaging Survey for Planets around Young stars. SPHERE follow-up observations reveal scattered-light disks, stellar binaries, and candidate exoplanets.
2026 in prep.	Elisabeth C. Matthews, **Paul V. Steimle**, et al. JWST/NIRCam observations and archival data rule out planets to sub-Jupiter masses in the eccentric HD 53143 debris disk.

Relevant Expertise

Languages	German: native speaker English: C1 (TOEFL iBT 108) Spanish: A2 (ZSL Heidelberg)
Tools and Programming	Python – advanced (numpy, scipy, astropy, emcee, matplotlib, etc.) Git – advanced LaTeX – advanced Java – basic Proficient in Linux, macOS, Windows
